

You Name the Application .....

..... We Build the equipment !

We convert your expectations in to reality !!

# D Y N A M I C

## Engineering and Solutions

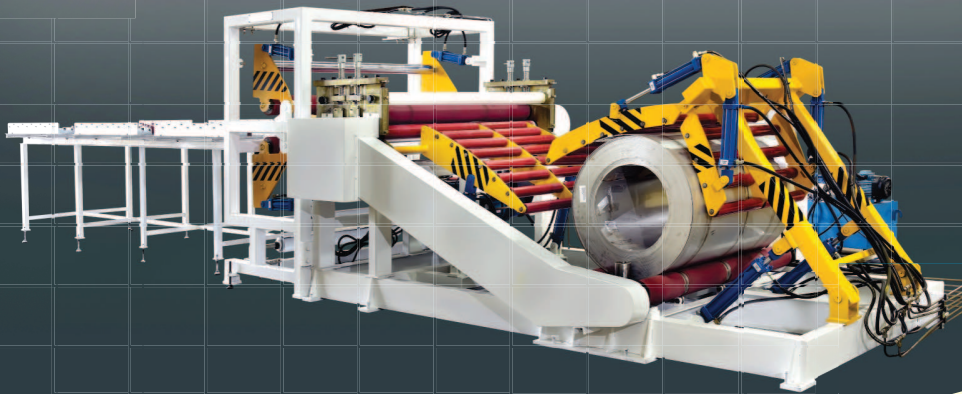

An ISO 9001 : 2015 Certified Company

Automation Solutions

### Coil unwinding, straightening and plastic coating machine

#### Features

1. Indigenous technology – Service available in INDIA
2. Helps to achieve compliances required in GMP for food & pharma equipment manufacturing process.
3. Unwinding & Winding of coil is done safely.
4. Plastic paper (Surface Protection Film) is applied uniformly on both the sides at a time.
5. No need of skilled manpower.
6. Very less manpower required as compare to manual operations.
7. Less space requirement.
8. Reduction in EOT crane Engagement time.
9. Faster & quality output resulting in to high productivity.
10. You can attach shearing machine or plasma cutting gantry for cutting.
11. Cutting length measurement facility can be provided.

#### Specifications:

Description	Unit	Specification
Maximum diameter of Coil	mm	1200 Approx.
Maximum Thickness of material	mm	6
Maximum Width of Coil	mm	1500
Maximum weight of Coil	Kg	5000 Approx.
Loading/Unloading of the coil		Manually/by EOT
Input Supply	V.A.C	415, 50HZ, 4 Wire

**Stop!**  
Still using old, Manual, Time consuming & unsafe method to apply protection paper ?

**Go** for DE & S developed efficient, automatic, safe, time saving equipment and relax!

**Address :** Plot No.2, Sector No. 07, P.C.N.T.D.A., Bhosari, Pune - 411 026. (India)
