Screw Conveyor Deburring Machine

**Function: Removal of residual burr from screw conveyor flight edge, after its machining
Providing radius / chamfer on outer diameter of the flight as required for hard facing.**

Salient Features :

- ✓ Burr removal made Easy.
- ✓ High Productivity.
- ✓ Enhancement in job quality.
- ✓ Cost effective, Value added machine.
- ✓ Tedious manual work avoided.
- ✓ Making operations safe.
- ✓ Customizable according to requirements

Table- Technical specifications :

Description	Unit	Specification
Maximum diameter of job	mm	450
Minimum diameter of job	mm	200 approx.
Maximum job Length	mm	2400
Minimum job Length	mm	1000
Maximum job Weight	Kg	600
Maximum screw flight pitch	mm	250 approx.
Minimum screw flight pitch	mm	90
Overall dimensions of the Equipment	mm	4210x1400x1400
